

OM AJINATH KHADE

AI & DATA SCIENCE ENGINEER | FULL-STACK DEVELOPER

Email: omkhade09@gmail.com | Phone: +91 7588021256 | Location: Kolhapur, Maharashtra, India (Open to Relocation / Remote)
GitHub: github.com/omkhade75 | LinkedIn: linkedin.com/in/om-khade-596295372 | Portfolio: omkhadeportfolio.onrender.com

EDUCATION & ACADEMIC STANDING

- B.Tech in Artificial Intelligence & Data Science** — Next Wave Institute of Advanced Technology (collaborated with SGU)
- **Academic Metrics:** Semester 1: **9.5 SGPA** | Semester 2: **9.32 SGPA** (Current Sem 3: Advanced DSA in C++ & Distributed Backends)
 - **Competitive Entrance:** MHT-CET: **96 Percentile** | JEE Main: **91 Percentile** | 10th Board: **92%**

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript (ES6+), TypeScript, SQL
- **Full-Stack & Backend:** React JS, Node.js, Express.js, RESTful APIs, JWT Authentication, Tailwind CSS
- **Databases & ORM:** PostgreSQL, Prisma ORM, Supabase, MongoDB, MySQL
- **AI & Emerging Systems:** Multi-Agent AI Systems, OpenAI API, ElevenLabs Voice, RAG Pipelines, Three.js / WebGL
- **Developer Tools:** Git, GitHub, Postman, Vite, VS Code, Render, Vercel, Linux / Bash

FEATURED PROJECTS & SYSTEMS

OmniMind AI — Enterprise Multi-Agent ERP System | React, TypeScript, Node.js, Prisma ORM, PostgreSQL, Multi-Agent AI

Live URL: <https://omni-ai-5uz8.onrender.com>

- Architected a decoupled multi-agent ERP platform orchestrating autonomous executive personas (CEO, CFO, COO agents) for automated retail risk analysis.
- Engineered relational PostgreSQL schema via Prisma ORM for tracking inventory ledger shifts and POS transactions, coupled with live external market data APIs.

Saffron — Restaurant Operating System & POS | React 19, Node.js, Express.js, PostgreSQL, Prisma ORM, TanStack Query

Live URL: <https://restaurant1-frontend.onrender.com/login>

- Built an end-to-end restaurant POS and Kitchen Display System (KDS) using TanStack Query server-state caching for real-time order synchronization across tablet stations.
- Designed Role-Based Access Control (RBAC) across waitstaff and administrative endpoints, with dynamic UPI payment QR code generation for instant table-side billing.

Agentrix — AI Voice Agent Playground | React, TypeScript, Node.js, Supabase, OpenAI API, ElevenLabs

Live URL: <https://agentixxai.lovable.app>

- Developed a conversational voice agent orchestration playground with a low-latency Node.js audio streaming buffer proxy piping TTS chunks from ElevenLabs to client visualizers.
- Implemented Web Audio API AnalyserNode frequency extraction for real-time waveform visualization alongside customizable JSONB prompt profiles.

MediCare — Cloud-Native Hospital Management OS | React 18, TypeScript, Supabase Edge Functions, PostgreSQL RLS, OpenAI API

Live URL: <https://hospital-man-fronted.onrender.com/>

- Constructed a multi-role hospital management platform utilizing Supabase Edge Functions and PostgreSQL Row Level Security (RLS) for doctor/patient data privacy.
- Integrated an automated OpenAI triage assistant for intelligent initial symptom pre-screening and appointment classification.

HACKATHONS & RECOGNITION

- **NASA International Space Apps Challenge (2025):** Awarded **Galactic Problem Solver** for building technology-driven space data analytics solutions.
- **Smart India Hackathon (SIH 2025):** **National Participant** selected in India's flagship innovation competition by the Ministry of Education & AICTE.
- **Specialized Buildathons:** Competed in OpenAI Academy × NxtWave Buildathon, Murf AI Hackathon, Meta × Scaler Hackathon, and Takeover Hackathon.
